

# Mobrey 9700 Transmitter

## Submersible Hydrostatic Level Transmitters

- *Hydrostatic electronic level transmitters*
- *Factory sealed and tested for submersed duty*
- *4–20 mA output signal proportional to level*
- *Flush mounted ceramic sensor*
- *Good long term stability*
- *Ideal for industrial or marine applications*
- *Wide range of mounting options*
- *Low cost installation*
- *Readouts for control room or plant mounting*
- *Site adjustable specific gravity (SG) compensation*
- *Intrinsically safe certified*

# Mobrey 9700 Transmitters

## Reliable Performance...In Challenging Applications

### THE MOBREY 9700 SERIES TRANSMITTERS

The 9700 Series range of tank level transmitters from Mobrey provide the measurement solution where in-tank problems such as foaming, vapor layers, and temperature gradients prohibit the use of other instrumentation.

The 9700 Series transmitter is designed to perform in the extreme conditions of today's industrial measurement applications.

Transmitters are available in both **submersible** and **externally mounted (floodable)** versions. Each transmitter version gives a high performance, has good long term stability, and is virtually maintenance free. A ceramic sensor ensures precise and reliable measurement with an accuracy of better than 0.1%.

Mobrey 9710 Transmitter

### OPERATION

At the heart is a Ceramic Capacitive Sensor (CCS). This pressure sensor provides a "flush" diaphragm, avoiding the risks of sensor clogging and ensures an extremely low hysteresis, minimal output drift, and high repeatability.

The sensor is manufactured using an aluminium oxide ceramic and provides outstanding resistance to chemical attack. The measuring range is determined by the ceramic thickness, which is precisely controlled during the manufacturing process. The sensor works like a capacitor with electrode surfaces on the inside comprising one measuring and one reference capacitor.

The surfaces of the capacitors are gold-plated and linked to ASIC electronics. These electronics generate a signal proportional to the applied pressure, which is sent to the 4–20 mA signal conditioner.

### FEATURES

- Two-wire 24 Vdc loop-powered
- 4 to 20mA, remote zero and span option
- Accuracy  $\pm 0.1\%$  of calibrated span
- Ranges up to 200 m / 656 ft. H<sub>2</sub>O, and 10:1 rangeability
- Ceramic capacitive sensor
- Low maintenance
- Fully submersible IP68 / NEMA 6P
- Reverse polarity protection
- Intrinsically safe option
- Dedicated marine version

Mobrey 9720 Transmitter

### BENEFITS

- Unaffected by difficult ullage conditions
- Stable readings under adverse conditions
- Control electronics may be remote mounted

## Product Data Sheet

IP0078, Rev BA  
February 2012

# Mobrey 9700 Transmitters

## SPECIAL FEATURES

### Accuracy Better than $\pm 0.1\%$ of Calibrated Span

The ceramic sensor is a "dry cell", meaning that no isolating diaphragm and fill fluid is needed. The process fluid acts directly onto the rugged, corrosion resistant sensor.

The 9700 Series provides an accuracy of better than  $\pm 0.1\%$  of calibrated span and good long term stability.

### Protected from Aggressive Environments/Processes

The 9700 Series withstands the harshest of environments and processes. Its rugged ceramic sensor is inherently capable of withstanding attack from most chemicals.

### Glanding System

The glanding system used with the submersible versions ensures absolute integrity of the IP68 / NEMA 6P rating.

IP68 / NEMA 6P units are generally factory fitted with the required length of vented cable.

### Mounting options

The 9700 Series is available in various mounting configurations, all are rated IP68.

- 9710 – Cable suspended
- 9720 – Clamped, cable suspended
- 9780 – Pole mounted
- 9790 – Flanged

#### NOTE:

Threaded mounting is available upon request.

### Optional Remote Zero and Span

To simplify installation, all 9700 Series transmitters can be supplied with remote zero and span.

Remote zero and span allows zero and full scale output to be set without removing the sensor from a process. This option includes an IP67 junction box.

### Bellows

For humid environments or sea water applications, bellows must be selected (option code "4" of zero and span).

Mobrey 9780 Transmitter

Mobrey 9790 Transmitter

## Mobrey 9700 Transmitters

## Mobrey 9700 Hydrostatic Electronic Level Transmitter (Commercial Version)

- Ranges up to 656 ft. (200 m) of H<sub>2</sub>O
- Fully submersible IP68 / NEMA 6P
- Two-wire 24 Vdc loop-powered
- 4–20 mA output
- Remote zero and span option

Table 1. Commercial Mobrey 9700 Ordering Information

Process Connection	
A <sup>(4)</sup>	Slip-on flange, DN25 PN40 (DIN 2635)
B	Fixed flange, DN40 PN40 (DIN 2635)
C	Fixed flange, DN50 PN40 (DIN 2635)
D	Fixed flange, DN80 PN40 (DIN 2635)
E <sup>(6)</sup>	Slip-on flange, 1-in. ASME B16.5 Class 150
F	Fixed flange, 2-in. ASME B16.5 Class 150
G	Fixed flange, 3-in. ASME B16.5 Class 150
X	None
Pole <sup>(5)</sup> – Specify the pole length with the order	
0	Pole without joints
1	Pole with one joint
2	Pole with two joints
3	Pole with three joints
4	Pole with four joints
9	No pole
<b>Typical Model Number: 97 10C S 1 A 1 P 0 X 9</b>	

(1) Not available on flanged versions.

(2) Specified suspended cable and pole length is from the transmitter front face. The maximum allowed cable length is 220 m.

(3) Approval Code 1 (ATEX II 1 GD EEx ia IIB T4) is not a standard option, but is available as a special.

(4) Not available for the 9780 version.

(5) For pole lengths over 2 m, the pole is divided into equal lengths using pole joints.  
The maximum number of poles for assembly is 4 off with a maximum length of 2 m per pole.

## Specifications for 9710, 9720, 9780, and 9790

### FUNCTIONAL

#### Output signal

Two-wire, 4-20mA

#### Power supply

10 to 30 Vdc

#### Load resistance

$R=50 \times (\text{supply voltage}-10V) \dot{U}$

#### Measuring range

Up to 200 m / 8 in. to 656 ft. H<sub>2</sub>O (see note)

#### Overrange limit

5 x range up to a max 600m / 1968ft H<sub>2</sub>O

#### Span adjustment

+10 to + 100% URL\*

#### Process temp. limits

9710, 9720 & 9780 -20 to + 60°C / -4 to +140°F

9790 -20 to + 90°C (80°C Ex ia)

#### Ambient temp. limits

-20 to + 60°C

#### Humidity limits

0 to 100% RH when terminated using the 9710/077 vented terminal box

#### Hazardous area certification

ATEX II 1 G EEx ia IIB T4

CSA (Canada & USA)

### PERFORMANCE

#### Accuracy

±0.1% \*\* of calibrated span  
(includes effects of linearity, hysteresis and repeatability)

#### Stability

± 0.1% Upper Range Limit (URL) per 6 months

#### Temperature effect

±0.015% Upper Range Limit (URL) per °C / °F  
(over ambient temp. range)

### PHYSICAL

#### Cable entry

Glanding system supplied with required length of vented cable

#### Wetted Parts

##### Sensor

Ceramic

##### Sensor housing

316 Stainless steel, Aluminium bronze

##### Seal rings

Fluorocarbon (FPM/FKM), Nitrile

##### Cable

Polyurethane

Fluorinated Ethylene Polypropylene (FEP)

##### Pole

316 Stainless Steel pole supplied with 316 Stainless Steel Housing option

Copper Nickel pole supplied Aluminium Bronze Housing option

#### Ingress protection

IP68 / NEMA 6P (200m / 656ft H<sub>2</sub>O)

#### Approximate weight

0.7Kg / 1.54lbs (sensor only)

#### Remote Enclosure

Aluminium alloy IP67 Grey (RAL 7001) 0.7 kg

#### Bellows Enclosure

Polyester IP67 Grey (RAL 7001) 1.2 kg

## Mobrey Level Solutions

Emerson provides a wide range of Mobrey products for level measurement applications.

### POINT LEVEL DETECTION

#### Vibrating Fork Liquid Level Switches

For high and low alarms, overflow protection, pump control, including wide pressure and temperature requirements, and hygienic applications. Flexible mounting. Immune to changing process conditions and suitable for most liquids.

- Mobrey Mini-Squing (Compact)
- Mobrey Squing 2 (Full-featured)

#### Ultrasonic Gap Sensor Liquid Level Switches

For use in non-hazardous industrial processes to detect high or low liquid levels and liquid interface. Immune to changing density, and wide dielectric and pH variations. Suitable for use in most clean and non-aerated liquids, with options for sludges and slurries.

#### Float and Displacer Liquid Level Switches

Mobrey electromechanical float and displacer level switches are ideal for alarm and pump control duties, especially in critical applications or hazardous areas.

- Mobrey Horizontal Level Switches
- Mobrey Vertical Level Switches

Chambers are available for external mounting of these level switches on process vessels.

#### Dry Products Level Switches

For high and low level alarms. Including threaded mounting connections, extended lengths, high temperature capability, and multiple detection techniques. Suitable for a wide variety of powders, granules, and free flowing solids with wide variations in bulk densities.

- Mobrey VLS Series – Vibrating Rod Level Switch
- Mobrey PLS Series – Paddle Level Switch
- Mobrey CLS Series – Capacitance Level Switch

### CONTINUOUS MEASUREMENT

#### Ultrasonic Continuous Level Transmitters and Controllers

Top mounted, non-contacting for simple tank and open-air process level measurements. Unaffected by fluid properties such as density, viscosity, dirty coating, and corrosiveness. Intrinsically Safe versions are available for operating in hazardous areas.

- Mobrey MSP Series Ultrasonic Level and Flow Transmitters
- Mobrey MCU900 Series Universal Controllers

#### Ultrasonic Sludge Density Blanket Monitoring and Control

Ultrasonic in-line pipe or tank mounted sensors for sludge density measurement and control, and top mounted ultrasonic sensors for continuous measurement of sludge blanket level in Industrial and Municipal effluent treatment processes.

- Mobrey MSM400 – Sludge Density Monitor
- Mobrey MSL600 – Sludge Blanket Level Monitor

#### Displacer Continuous Level Measurement

Top mounted in a vessel or externally mounted in a vertical chamber. For use in hazardous areas.

- Mobrey MLT100 – Displacer Level Transmitter

#### Hydrostatic Continuous Level Transmitter

For level measurements in non-pressurized tanks where in-tank problems such as foaming, vapor layers, and temperature gradients prohibit the use of other instrumentation.

- Mobrey 9700 Series hydrostatic electronic level transmitters

### SPECIALIZED CONDUCTIVITY

#### Conductivity Water and Steam Interface Monitoring

Steam/water interface level gauges using specialized, high performance conductivity probes in external columns and manifolds, ideal for steam plants where reliable and redundant indication of boiler water level and turbine protection is critical.

- Hydratect 2462 – Water/Steam detection Systems
- Hydrastep 2468 – Water/Steam Monitoring Systems
